**Reasons for Allowance:**

The independent claims recite a message delivery mechanism comprising a transaction server, a database, a scheduler and a message queue elements and a limitation for the following:

"wherein the transaction server accesses the database, the scheduler and the message queue"

The prior art of record teaches message delivery mechanisms with some of the elements. None of the prior art alone or in combination suggests a transaction server which accesses the elements as claimed in the limitation. New search updates revealed no other prior art which teaches the limitation in the context of the claims. Therefore, claims 63-86 are indicated allowable.

**Drawings**

Applicants' explanations with respect to the Drawing objection in the 9/22/04 Office Action were accepted and, therefore, the drawing objection is withdrawn.
